CUSTOM-BRANDED UNIFORM MANUFACTURING · DELHI

UNIFORM PROGRAMME CATALOGUE · 2026

Uniforms built to *your* identity.

Your crest digitised thread-for-thread. Your colours matched from your own swatch, not the nearest shade on the shelf — then put on your own online store, so your team orders directly from us and your office never handles a uniform again.

WHY THIS CATALOGUE EXISTS

A uniform programme fails quietly. Here is where.

Nobody changes uniform supplier because of the first order. They change because of the **fourth** — when the reorder arrives half a shade off, the crest sits differently on a size XXL, and the front desk is fielding sizing calls it never signed up for.

Colour drifts, a shade at a time

Each batch is matched to the last batch rather than to the original reference, so year three no longer resembles year one.

We match every batch to your physical swatch or Pantone reference on file — never to the previous run.

The crest gets approximated

A near-enough badge, redrawn by whoever holds the machine, scaled differently across sizes.

Your crest is digitised once into an embroidery-ready file and checked for position and scale on XS and XXL alike.

The admin lands on your desk

Stock, cash handling, sizing queries and exchanges quietly become your office's problem.

Your own online store takes the order and the payment. Sizing and exchanges come to us, not to you.

What we actually sell

Not garments by the piece. A **written specification** — fabric, colourway, crest file, logo placement, size grade — agreed once, approved on a physical sample, and produced against for as long as you stay with us.

That document is the product. Everything else is manufacturing against it.

Included in every programme, at no separate charge

- Crest or logo digitisation into an embroidery-ready file
- Colour matching against your physical swatch or Pantone reference
- A physical sample for approval before any bulk cutting
- An on-site measurement drive for a first bulk order
- A written specification you keep

What that discipline is worth to you commercially

0
STOCK HELD BY YOU
No uniform counter, no receivable, nothing to reconcile.

1
SPECIFICATION, REUSED
No re-quoting or re-sampling on every top-up order.

1
STORE PAGE, YOURS ONLY
Your garments, your colourway — wearers order direct, you handle nothing.

∞
REORDERS ON FILE
A single garment or a full intake, produced against the same document.

> A uniform is the most-worn piece of an organisation's identity — more visible over a year than any prospectus, brochure or signboard.

Prices are quoted per programme. Garment mix, order volume and customisation scope all move the price, so we do not publish a rate card we would have to qualify in every conversation.

ABOUT UNIFORMEDGE

Every uniform tells an organisation's story.

Every uniform should look like it belongs to the organisation that wears it.

Most institutions inherit their uniform supplier the way they inherit a photocopier contract — whoever was there first stays by default, and the uniform ends up looking like everyone else's. We started UniformEdge around a simpler idea: a uniform is part of an identity, and it should be built that way.

In practice that means matching your crest thread-for-thread, matching your colours to the actual palette in your branding guide rather than to the nearest available shade, and staying with you year after year instead of forcing a fresh vendor search every time something needs reordering.

Built to your identity

Your crest digitised and stitched to match, and fabric matched to your official palette before production starts — not approximated after.

Made to survive the year

Colourfastness and shrink-control testing before bulk cutting, and reinforced stitching at collars, cuffs, knees and seat.

A partner, not a transaction

One relationship managed year to year, so the uniform programme becomes one less thing for your team to manage — not one more.

Where the tailoring comes from

UniformEdge traces its roots to **Neeraj School Uniforms**, founded by Ramesh C Verma as a small shop in Subhash Nagar, Delhi, in **1995**.

UniformEdge and Neeraj School Uniforms are separate businesses in the same family. Neeraj continues to trade; UniformEdge carries the same tailoring heritage forward into its own manufacturing.

Three decades, one discipline

A shopfront in 1995 taught the part that still decides everything: a uniform is judged in month nine, not week one. That is why nothing is cut at volume here until a physical sample has been held and signed off.

SECTORS WE SUPPLY

Five sectors, one facility

Schools are our core, and the sector our tailoring roots come from. The same cutting floor, colour matching and quality checks now dress offices, hospitals, kitchens and industrial sites.

CORE **School Uniforms**

Full uniform programmes for schools across Delhi, from KG through senior years. Summer, winter, formal and sports.

Page 07

Corporate Uniforms

Front-office and field staff dressed consistently across every branch, in your brand colours.

Page 15

Healthcare Uniforms

Scrubs, lab coats and staff wear for hospitals, clinics and diagnostic centres — colour-coded by role.

Page 16

F&B & Hospitality Uniforms

Chef wear, service uniforms and aprons for restaurants, hotels, cafés and catering operations.

Page 17

Industrial & Workwear

Coveralls, work shirts and high-visibility wear for factories, warehouses, logistics and site teams.

Page 18

One supplier across the group

Trusts and management companies often run more than one operation. The same specification discipline that holds a brand's colour across forty branches holds a school's crest across twelve year groups.

One point of contact for all of it.

Common to every programme, whichever sector

Made in our own facility

Cutting, stitching and quality checks under our control in Delhi — not brokered out and hoped for.

Colour matched, not approximated

Matched from your physical swatch or Pantone reference, and held across reorders so later batches sit beside the first.

Sample approved before bulk

Nothing is cut at volume until you have held a physical sample and signed it off.

Who we normally deal with

Principals & trustees

Want the crest right and the front desk out of uniform admin.

HR & admin heads

Want every branch dressed the same, and new joiners kitted without a fresh quote.

Procurement & purchase

Want a written specification and GeM-eligible supply.

Facility & operations managers

Want workwear specified to the actual task, not a general range.

02

School uniform programmes

Complete programmes — summer and winter, formal and sports, KG through senior — built around a school's own colours and crest, with parents ordering directly from us.

SCHOOL UNIFORMS

School uniforms, tailored per school

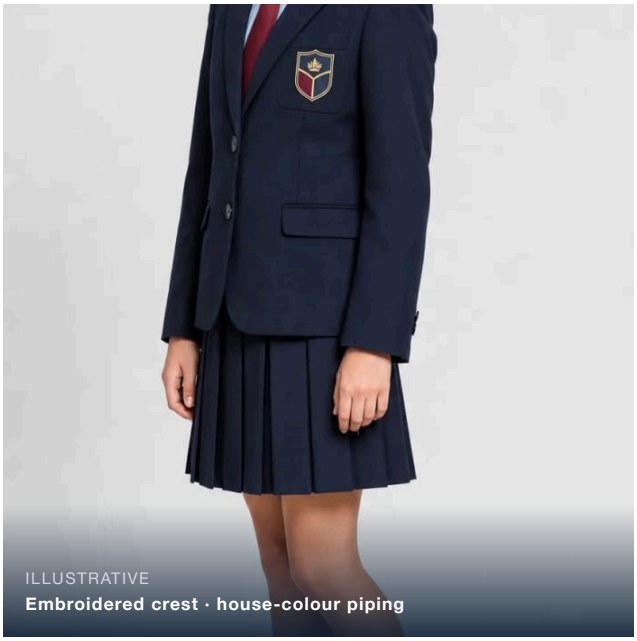

Schools are where UniformEdge started, and they remain the core of what we do. We run complete uniform programmes — summer and winter, formal and sports, KG through senior — built around a school's own colours and crest.

Who this is for

Principals, trustees, administrators and uniform committees at schools that want the uniform to read as *theirs* — and want it to stop consuming office time.

The problems it solves

- A crest that looks approximate, or sits differently across sizes
- Reorders arriving a shade off the garments already in circulation
- Uniform stock, cash and sizing queries landing on the school office
- A vendor search every time the programme needs refreshing

ILLUSTRATIVE
Embroidered crest · house-colour piping

The wardrobe we build

Shirts & trousers	Half and full sleeve, adjustable waistbands, reinforced collars and cuffs
Skirts & pinafores	Box-pleat and A-line, colour-matched to the blazer
Blazers & winter wear	Embroidered crest, house-colour piping, sweaters and cardigans
Sports & PE kit	House T-shirts, track pants and shorts in house colours
Accessories	Ties, belts, socks, badges and school bags

Pure cotton for warm-climate daily wear · poly-cotton where wrinkle resistance and fast drying matter · terry cotton for trousers and skirts that need structure.

What we control that a general supplier does not

Crest accuracy
Your crest digitised into an embroidery-ready file, not approximated — and checked for position and scale on every size.

Colour held year to year
Matched to your official palette before cutting, so reorders match the garments already in circulation.

Sizing across the whole school
Charts calibrated to your students, with an on-site measurement drive before a first bulk order.

Specified once, then repeatable
The full wardrobe agreed as one written specification with your sign-off on a physical sample. Every later order is produced against that same document, so nothing drifts.

> The result reads as that school's uniform — not a generic one with a badge added.

YOUR ONLINE STORE

Every school gets its own uniform store

Most uniform complaints never reach us — they reach your front desk. Our programme is built so they do not. Your school gets its own store page listing only your garments; parents order there, pay us, and take delivery at home.

The school

Sets the specification once — colours, crest, wardrobe, size grade. Then steps out.

→

UniformEdge

Manufactures, holds the stock, takes the order, takes the payment, ships to the home.

→

Your store page

Parents order and pay there. Exchanges come to us on WhatsApp.

NO MONEY, NO STOCK AND NO SIZING QUERIES PASS THROUGH THE SCHOOL

A store page that is only yours

Your garments, your colourway, your size chart — so a parent cannot order the wrong item.

Delivered to the home

No uniform counter, no queue at the office, no collection day to staff and supervise.

Payment taken online, by us

Parents pay through the store. The school holds no stock, carries no receivable and reconciles nothing.

Sizing and exchanges come to us

Growth spurts, wrong sizes and mid-year joiners are handled between us and the parent on WhatsApp.

What changes for the school office

TASK	TYPICAL UNIFORM SUPPLIER	WITH UNIFORMEDGE
Holding stock	School stores sizes and reorders blind	**We hold it. The school stores nothing.**
Taking payment	Office collects, reconciles and refunds	**Taken online by us. No receivable.**
Sizing queries	Front desk fields them all year	**Handled by us on WhatsApp.**
Exchanges	Collection days, staffed and supervised	**Between us and the parent, to the home.**
Mid-year joiners	Ad-hoc order, ad-hoc price	**Ordered from the store, any time of year.**
Next year's order	Fresh quotes, fresh samples, fresh vendor search	**Same document, same colourway, no re-sourcing.**

What your store page carries

- ✓ Only your school's garments, in your approved colourway
- ✓ Your size chart, calibrated from the measurement drive
- ✓ Summer, winter, sports and accessories — the full wardrobe

One link, sent once

Share it in a circular or as a QR on the admission pack. Parents keep it for as long as their child is with you.

Store pages go live as each school joins. Until yours is live, ordering runs on WhatsApp and email on the same direct-to-parent model.

SCHOOL ESSENTIALS

The rest of what a school issues

A school issues more than clothing, and most of it ends up spread across separate suppliers — one for uniforms, another for stationery, a third for printing. We supply the rest of what you issue alongside the uniform programme, to the same colours and the same crest artwork, on one order and one contact.

Printed notebooks

School-branded covers printed to your artwork, in the rulings and page counts you issue by year group.

ID cards

Student and staff cards carrying your crest and house colours, with lanyards to match.

House flags & banners

House and school flags in your exact colours — for assembly, sports day and the hall.

Sashes

House and sports sashes, colour-matched to the same references as the uniform so they sit together.

Sports kit & accessories

The equipment and accessories that go with the sports programme, alongside the kit we manufacture.

One order, one contact

Specified together with the uniform, quoted together, delivered together. Your office chases one supplier, not four.

What we need to quote these

Your artwork

Crest and logo files, plus the colour references already on record for your uniform. Nothing new to supply if we already make your uniform.

Quantities by year group

Rough numbers are enough to quote. Notebooks and ID cards price on volume, so a range is more useful than a guess at precision.

When you need them

Session start, sports day, a house event. We schedule backwards from the date rather than from the day the order lands.

Made versus supplied — the distinction we keep. Uniforms are manufactured in our own Delhi facility. The items on this page are supplied: sourced and branded to your specification, under the same colour matching and the same approval before anything is produced at volume. We would rather say which is which than let it be assumed.

SIZE GUIDE

Sizing, calibrated to your students

Sample chart shown below — the final chart is calibrated to your school's actual student measurements during onboarding.

SIZE	APPROX. AGE	CHEST (IN)	HEIGHT (CM)
XS	4–5 yrs	24–25	100–110
S	6–7 yrs	26–27	111–122
M	8–9 yrs	28–29	123–134
L	10–11 yrs	30–31	135–146
XL	12–13 yrs	32–34	147–158
XXL	14–15 yrs	35–37	159–168
Adult S/M	16+ yrs	38–40	169+

How to measure

1. **Chest** — around the fullest part, tape level under the arms, one finger of ease.
2. **Height** — against a wall, shoes off, heels together.
3. **Waist** — at the natural waistline, not on the hip. Trousers and skirts are graded from this.

On-site measurement drive

For schools with a wide size spread, we run an on-site drive so every student is fitted before the first bulk order is cut — included in every programme at no separate charge.

Fewer exchanges, fewer mid-term reissues, and a size grade you keep on file.

Graded, not scaled

Crest position and proportion are checked at each size so a size XS and a size XXL carry the mark identically.

Measured against the grade

Garments are sampled from each production run, so a size M in the reorder matches the size M already owned.

Growth built in

Adjustable waistbands on trousers and skirts, so a mid-year growth spurt does not automatically mean a new garment.

Daily wear & winter

Shown in indicative colourways. Every garment below is produced in your school's own palette, with your crest applied to the approved artwork.

Shirt & trousers
BU-SH-01 · BU-TR-02 — cotton or poly-cotton shirt, terry cotton trouser

Shirt & shorts
BU-SH-01 · BU-SR-03 — summer set for KG and primary

Blouse & skirt
GU-SH-04 · GU-SK-05 — box-pleat skirt, colour-matched to the blazer

Pinafore set
GU-SK-05 — A-line pinafore over a full-sleeve blouse

Salwar-kameez set
GU-SK-06 — cotton blend, with dupatta in house colour

KG frock
Pre-primary daily wear, cut for movement and easy laundering

Sweater / pullover
BL-SW-08 — acrylic-wool, house colour with crest

Cardigan
BL-CD-09 — acrylic-wool, button front, embroidered crest

The same garment, your palette

Every style on these two pages is cut in your school's own colourway. Below: four indicative palettes, each built from a shirt ground, a bottom-weight, a house accent and a trim.

Navy & maroon
Sky shirt · navy bottom · maroon house · gold trim

Grey & forest
White shirt · charcoal bottom · forest house · brass trim

Indigo & rust
Ice shirt · indigo bottom · rust house · white trim

Cocoa & teal
Cream shirt · cocoa bottom · teal house · amber trim

Garment imagery and swatches are illustrative. Production colour is matched to your own swatch or Pantone reference before cutting — never to an on-screen approximation.

Formal, senior & sports

Blazer & trousers
BL-JK-07 — wool blend, embroidered crest, house-colour piping

Blazer over knitwear
BL-JK-07 · BL-SW-08 — layered winter set

Girls' blazer & skirt
BL-JK-07 · GU-SK-05 — structured tailoring, pleated skirt

Senior formal — girls
Senior-year specification, crest on chest pocket

Senior formal — boys
Full formal set for senior years, prefects and school events

House kit
SP-TS-10 · SP-SR-12 — moisture-wicking tee, quick-dry shorts

Track set
SP-TS-10 · SP-TP-11 — poly blend, house-colour side piping

Want these in your colours?

Send your crest artwork and a physical swatch or Pantone reference. We return a colour-matched physical sample for approval before anything is cut.

Send your artwork

How your mark is applied

Three methods, chosen per garment rather than applied uniformly — recommended against the garment and the wash cycle it will live through.

METHOD 01

Digitised embroidery

Your crest converted into an embroidery-ready file and stitched directly into the garment.

Best on blazers, sweaters, cardigans and shirt pockets. Outlasts the garment.

METHOD 02

Embroidered patch / badge

The crest embroidered as a separate patch (AC-BG-16) and applied to the garment.

Best where one crest must sit across several garment types, or be replaced independently.

METHOD 03

Print

Applied to knitwear and sports fabrics where embroidery would stiffen or pucker the cloth.

Best on house tees, track sets and event kit. Lower unit cost, shorter life than stitch.

School programmes & bulk pricing

Three programme levels, chosen by the size and structure of the institution rather than by a feature list. Every level includes the same specification discipline.

LEVEL 01

Starter

For single schools under 100 students, building their first custom uniform programme.

- ✓ Full customisation — crest, colourway, wardrobe
- ✓ Standard production timeline
- ✓ Email support

LEVEL 02 · MOST CHOSEN

Standard

For established schools with recurring reorders across the academic cycle.

- ✓ Everything in Starter
- ✓ Priority production slot
- ✓ Dedicated account contact

LEVEL 03

District / group

For school groups, trusts and multi-branch institutions ordering across sites.

- ✓ Everything in Standard
- ✓ Volume-tiered pricing
- ✓ Consolidated billing
- ✓ GeM tender eligible

Exact pricing depends on garment mix, order volume and customisation scope — contact us for a programme quote specific to your school. Any revision is agreed **before** the academic cycle begins, not during it.

What moves the price

Garment mix

A blazer-and-tie programme and a shirt-and-shorts programme are different orders. We quote the wardrobe you actually issue, not a standard bundle.

Volume per size

Cost follows the size spread as much as the headcount — a wide spread means more grades cut in smaller runs.

Customisation depth

A printed badge and a digitised embroidered crest are not the same job. Piping and non-standard colourways each add process.

Fabric grade

Within each fabric type there is a range. We show you the options against price rather than quoting one and assuming.

Included in every programme, at no separate charge

Crest digitisation into an embroidery-ready file · colour matching against your physical swatch or Pantone reference · a physical sample for approval before bulk cutting · an on-site measurement drive for a first bulk order · a written specification you keep.

Get a programme quote

03

Business & institutional uniforms

Corporate, healthcare, hospitality and industrial ranges — specified per client, quoted from your brief, and produced on the same cutting floor as our school programmes.

IN THIS SECTION

Corporate · Healthcare · F&B & hospitality
Industrial & workwear · Sector comparison

Corporate uniforms that hold a brand together

A corporate uniform is a brand asset that walks around. It does the same job as your signage — and it fails the same way, by drifting out of colour and looking tired.

Who this is for

HR heads, brand and marketing managers, admin and facilities leads at multi-branch businesses, banks, dealerships, retail chains and service companies.

The problems it solves

- One branch's uniform arriving half a shade off another's
- A logo redrawn or rescaled differently by each supplier run
- Front-office, back-office and field teams looking unrelated

Range

Formal shirts & blouses	Half and full sleeve, in brand-matched colours with optional logo embroidery
Blazers & waistcoats	Structured tailoring for front-office and customer-facing roles
Trousers & skirts	Cut to a consistent house specification across sites
Polo shirts & T-shirts	Smart-casual and event wear, embroidered or printed
Jackets & outerwear	Softshells and windcheaters for field and site teams
Ties, scarves & accessories	Colour-matched finishing pieces
Custom-branded tees & hoodies	Event, campaign and new-team kit, on a quick turnaround

Poly-cotton and blended suiting for shirts and formal wear — wrinkle resistance and colour retention matter most where garments are worn daily and laundered often.

What we control

Consistency across branches

Garments for every location produced in a single batch per colourway, so one branch's uniform matches another's rather than arriving a half-shade apart.

Role tiers that read as one family

Front-office, back-office and field teams get different garments built from the same palette and detailing — visibly distinct, visibly related.

Sizing an adult workforce

Adult size ranges vary far more than a school year group. We size from a staff measurement exercise rather than assumed distribution.

Commercial benefits

Brand consistency you can audit

One approved artwork file and one colour reference on record — so a compliance check has something to check against.

No re-specification on headcount growth

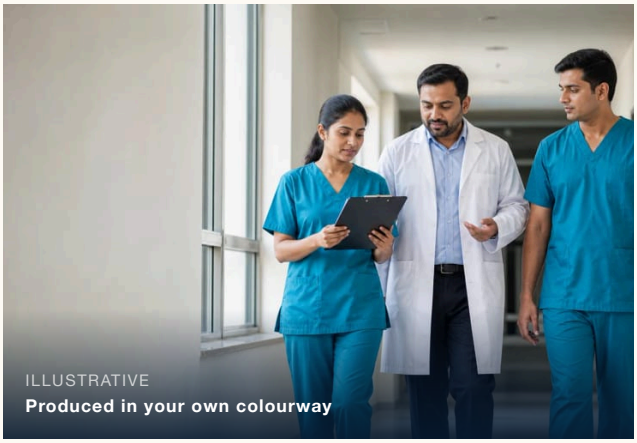

New joiners and branches are dressed from the standing specification, not a fresh quoting cycle.

Event kit without a second vendor

Branded tees and hoodies run alongside the main programme.

Healthcare uniforms built for hard laundering

Healthcare uniforms are laundered harder than anything else we make — washed hot, washed often, and expected to hold colour and shape through it. Fabric and finishing decisions that are nice-to-have elsewhere are the whole job here.

Who this is for

Hospital administrators, nursing superintendents, procurement and facility heads at hospitals, clinics, diagnostic centres and pathology chains.

The problems it solves

- Colour-coding by grade losing meaning as batches drift
- Scrubs shrinking or fading out of the ward's colour system
- Seams and fastenings failing before the style dates

Range

Scrub sets	Top and trouser, colour-coded by department or grade
Lab coats	Full and half length, with optional name and role embroidery
Nurse tunics & dresses	Cut for a full shift's movement, with contrast trims by grade
Theatre and procedure wear	Made to your department's specification
Warm-up jackets	Layering for cold wards and night shifts
Support & housekeeping wear	Distinct colourways for non-clinical staff

Poly-cotton blends for scrubs and tunics, where shape and colour survive repeated hot washing better than pure cotton. Specific finishes — fluid-resistant or antimicrobial — are specified to your requirement rather than assumed.

What we control

Built for hot, frequent washing

Colourfastness and shrink-control testing before bulk cutting matters more here than in any other sector we serve.

Colour-coding that stays exact

If grades are distinguished by colour, drift between production runs defeats the purpose. Every reorder is matched to the original reference.

Named and role-marked

Name, designation and department embroidery, so identification does not depend on a clip-on badge.

Commercial benefits

Wayfinding that survives the year

A patient reads department and seniority from colour before they read a name badge. Held colour keeps that system working two years in.

Longer replacement cycles

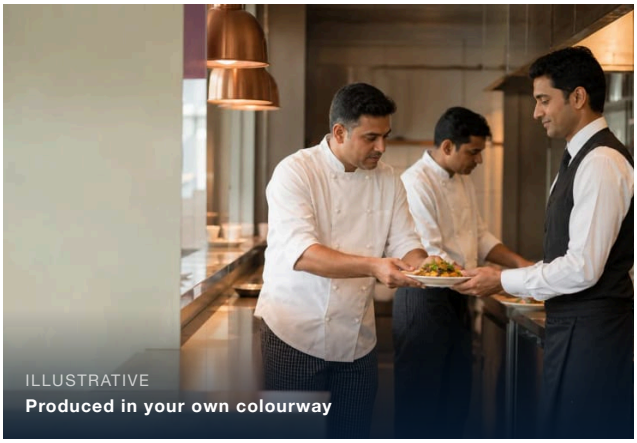

The failure here is colour loss and seam wear long before style. Specifying for the laundry cycle is what extends the cycle.

Department-level ordering

Each department's colourway is fixed in the specification, so a ward can reorder without re-deciding anything.

Kitchen and front-of-house, dressed for the job

Hospitality asks two different things of one programme. The kitchen needs garments that survive heat, oil and daily washing; the floor needs garments that look composed at the end of a long service. One fabric rarely solves both.

Who this is for

Hotel general managers, F&B directors, restaurant and café owners, catering operators and cloud-kitchen groups.

The problems it solves

- One fabric specified for both kitchen and floor, serving neither
- Chef wear looking tired after a season of aggressive laundering
- Service uniforms clashing with the property's own interior palette

Range

Chef coats & jackets	Double and single breasted, long and short sleeve
Chef trousers	Loose-cut for kitchen heat, in checks or solid colours
Aprons	Bib, waist and cross-back, in brand colours with optional embroidery
Front-of-house shirts & blouses	Service wear that holds its press through a shift
Waistcoats & service jackets	For formal dining and hotel front desk
Headwear & neckwear	Caps, skull caps, chef hats, neckerchiefs and ties

Heavier poly-cotton for chef wear, where durability and stain tolerance lead. Lighter blends front-of-house, where appearance and drape lead. Garments intended for food-handling areas are specified to your operating requirements.

What we control

Kitchen versus floor

Breathability and stain tolerance in the kitchen; drape and finish on the floor. Same identity, different specification.

Stains and hot washing

Kitchen wear is laundered aggressively and often. Darker colourways and tighter weaves stay presentable considerably longer.

Comfort at temperature

Kitchen garments are worn in heat for long shifts, so fabric weight and cut matter more than they appear to on a rail.

Commercial benefits

The first thing a guest reads

Front-of-house uniform is read before anyone speaks. Matched to your interior palette, the floor team looks like part of the room.

Two specifications, one visual family

Kitchen and floor are specified separately for their actual demands while staying recognisably one property.

Whole-property sourcing

Coats, aprons, headwear and service wear from one specification — nothing sourced separately and mismatched.

INDUSTRIAL UNIFORMS & WORKWEAR

Workwear that survives the shift

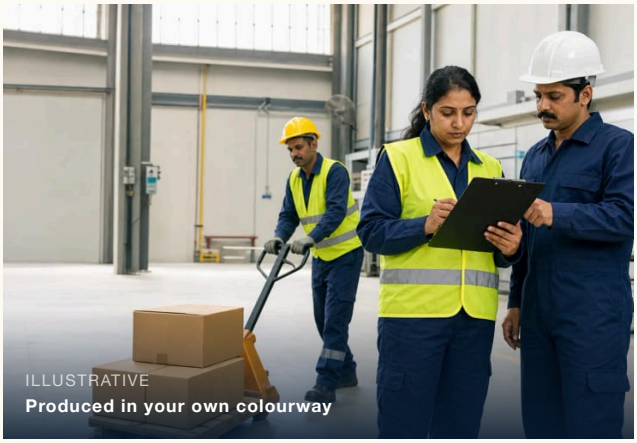

Industrial workwear is judged on how long it lasts and how well it protects. A garment that fails at the knee in month three costs more than the one specified properly.

Who this is for

Plant and factory managers, warehouse and logistics heads, EHS officers, and contractors supplying site teams.

The problems it solves

- Knees, seat and pocket mouths going before the rest of the garment
- One fabric weight specified across roles that do very different work
- High-visibility bought to a general range rather than the site requirement

Range

Coveralls & boiler suits	Full-body workwear with reinforced stress points
Work shirts & trousers	Heavier-weight everyday wear with utility pockets
High-visibility vests & jackets	Reflective tape configurations specified to your site requirement
Dungarees & bib overalls	For workshop and maintenance teams
Jackets & cold-store wear	Insulated layers for outdoor and refrigerated environments
Caps, aprons & accessories	Task-specific finishing items

Heavier cotton and poly-cotton drills for durability and abrasion resistance. Specialist protective finishes — flame-resistant or chemical-resistant — are sourced and specified against your stated requirement, not offered as a blanket claim.

What we control

Reinforced where it fails

Knees, seat, elbows and pocket mouths take the load. Double stitching and bar-tacks there decide whether a garment lasts a year or a quarter.

Fabric weight to the task

A warehouse picker and a workshop fitter need different cloth. One weight across a site over-serves one group and under-serves the other.

Visibility specified, not assumed

Where high-visibility is required, we build to the configuration and standard your site or client specifies — tell us the requirement and we manufacture to it.

Commercial benefits

Cost per shift, not cost per piece

A garment that lasts four times as long at 1.5× the price is the cheaper garment. Reinforcement is where that difference is bought.

One specification across every site

Staff and contractors across locations read as one organisation, however many sites the work covers.

Branding that survives the laundry

Your marks applied so they last the same laundering cycle the garment does — workwear is often your most-seen branding.

CHOOSE QUICKLY

Sector comparison

What actually differs between our five programmes — so you can find your row, read across, and brief us in one conversation.

Constant across all five

- ✓ Made in our own Delhi facility, under our own quality checks
- ✓ Colour matched from your physical swatch or Pantone reference
- ✓ A physical sample approved before anything is cut in bulk
- ✓ One written specification, reused on every later order
- ✓ One named contact on email or WhatsApp — not a call centre

Brief us in five lines

Everything we need to come back with a quote:

1. Sector and the roles being dressed
2. Headcount, and the size spread if you know it
3. The garments you actually issue
4. Your crest or logo artwork, and a swatch or Pantone reference
5. When you need it in hand

Send it to info@uniformedge.co.in or message us on WhatsApp.

Every programme is quoted per client. Garment mix, order volume and customisation scope all move the price, so we do not publish a rate card we would have to qualify in every conversation.

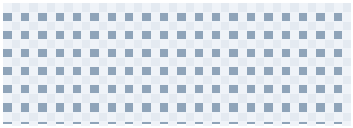

Built to survive daily wear

Fabric choice decides how a uniform looks in week one. Construction decides how it looks in month nine — and that is the one people remember when the reorder form comes round.

Pure cotton plain weave

Breathable and soft against skin. Best for warm-climate daily wear; shirts and summer sets.

School shirts · summer sets · warm-climate daily wear

Poly-cotton blend blended plain

Wrinkle-resistant and faster-drying. Holds shape and colour through frequent washing.

Corporate shirts · scrubs · chef wear · anything laundered often

Terry cotton twill, heavier

Heavier weight for trousers and skirts — better structure, less see-through in light colours.

School trousers · skirts · bottom-weight garments

How they compare

Four bars is the strongest performer in that row. Relative guidance for specification conversations, not laboratory ratings.

	PURE COTTON	POLY-COTTON	TERRY COTTON	DRILL
Breathability	■■■■	■■□□	■■□□	■□□□
Wrinkle resistance	■□□□	■■■■	■■■□	■■■□
Colour in hot wash	■■□□	■■■■	■■■□	■■■□
Structure & opacity	■□□□	■■□□	■■■■	■■■■
Abrasion resistance	■□□□	■■□□	■■■□	■■■■
Drying speed	■□□□	■■■■	■■□□	■□□□

Within each type, a range of grades

"Poly-cotton" is not one cloth. Weight, weave density and yarn quality all move within it — and they move the price.

We show you the options against price rather than quoting one grade and assuming.

Entry grade	₹
Standard grade	₹₹
Premium grade	₹₹₹

Which fabric we specify, and why

GARMENT	FABRIC WE SPECIFY	BECAUSE
School shirts	**Pure cotton / poly-cotton**	Worn against skin all day in Delhi heat. Cotton for comfort, poly-cotton where a parent wants less ironing.
Trousers & skirts	**Terry cotton**	Needs to hold a shape through a school day and not go see-through in light colourways.
Blazers	**Wool blend**	Structure and drape are the whole point — it is the garment the crest sits on.
Sports & PE kit	**Moisture-wicking poly**	Worn hard, washed immediately. Dries overnight so one set covers consecutive days.
Scrubs & tunics	**Poly-cotton blend**	Washed hot and often. Colour and shape survive the laundry cycle far better than pure cotton.

QUALITY CONTROL

Where a uniform fails

A uniform almost never fails in the middle of a panel. It fails at six predictable points, in a predictable order — and that is where our construction spend goes.

Points 1–5 are construction. Point 6 — colour — is not a place on the garment; it is checked batch by batch. The same six apply in every sector.

	FAILURE POINT	WHEN	ROOT CAUSE	WHAT WE DO
1	Collar	Months 3–6	Single-stitch construction, light interlining	**Reinforced collar construction**
2	Cuffs	Months 3–6	Button pull-through, thin plackets	**Reinforced cuff and button attachment**
3	Waistband	Months 4–8	Stitching gives before the cloth does	**Double-stitched, adjustable where specified**
4	Knees & seat	Months 2–4	No bar-tacking at load points	**Double stitching and bar-tacks at stress points**
5	Hem & side seams	Months 6–9	Seam allowance cut too fine	**Fuller allowance, locked seam ends**
6	Colour	Wash 15 onward	Batch matched to previous batch, not to source	**Every batch matched to the reference on file**

Four checks on every production batch

Colour against your reference

Against the swatch or Pantone on file — **not** the previous batch, which is how colour drifts.

Crest and logo placement

Checked against the approved sample, so the mark sits identically on XS and XXL.

Seams, cuffs and fastenings

The six points opposite, inspected before anything leaves the floor.

Measurement against the grade

Sampled from each run, so a size M in the reorder matches the M already owned.

Nothing is cut at volume until you sign off

A physical sample in your colourway is approved before bulk cutting, and becomes the reference every later batch is checked against. Specialist protective finishes are specified against your stated requirement, never offered as a blanket claim.

Why we match every batch to your reference, not to the last batch

Each run is matched to something. Match to the previous run and the error compounds; match to your original swatch and it cannot.

COMMON PRACTICE — Matched to the previous batch

Every run is within tolerance of the one before it — and five runs later the blazer no longer matches the one in the prospectus photograph.

OUR PRACTICE — Matched to your swatch, every time

The reference never moves, so the error never accumulates. Year five sits beside year one without reading as a different colour.

Drift shown exaggerated. The mechanism is the point: matching to a moving target compounds, matching to a fixed one does not.

OUR PROCESS

From first brief to delivery

Six steps. Steps 01–04 happen once. Step 06 is the one that removes the vendor search from every year after.

01

Consultation

We learn your identity, size spread and current uniform pain points — and what has gone wrong with the last supplier.

WEEK 1

02

Design & colour match

Crest or logo digitisation into an embroidery-ready file, and fabric colour-matching against your official palette.

WEEK 1–2

03

Sampling

A physical sample in your colourway is produced and sent for approval before any bulk cutting begins.

WEEK 2–3

04

Measurement drive

On-site or self-service sizing, so every wearer is fitted before volume is cut — not sized by assumption.

WEEK 3–4

05

Production & delivery

Bulk production against the approved sample, quality-checked and delivered ahead of term start or rollout date.

WEEK 4 ONWARD

06

Reorder programme

A standing relationship against the same written specification — so top-ups, new joiners and next year need no re-sourcing.

ONGOING

Working backwards from your date

Most uniform delivery problems are calendar problems. We plan from term start or rollout date backwards, not from the day the order is placed forwards.

Revisions before the cycle, not during

Any change to specification or pricing is agreed before the academic cycle or rollout begins — never mid-season.

The document outlives the order

You keep the written specification. If your team changes, the uniform programme does not have to start again.

Where it is actually made

Our own facility in Delhi, giving us direct control over cutting, stitching and quality checks. For specialised requirements and peak-season volumes we also use trusted production partners — under the same checks, and we say so rather than implying everything is in-house.

What happens to our offcuts

Cutting an order leaves fabric behind. We reuse our offcuts as packaging for the garments we send out — the waste from one order protects the next in transit. That is the extent of what we claim: no certification, one practice we actually follow.

Timings are indicative and confirmed against your delivery date at consultation. Peak-season lead times are agreed in writing before production is scheduled.

How we compare to a typical uniform supplier

Not a claim that others do these things badly — a description of what we have chosen to do differently, so you can check us against it.

	TYPICAL UNIFORM SUPPLIER	UNIFORMEDGE
Manufacturing	Brokered out to whoever has capacity	**Our own facility in Delhi, under our own quality checks**
Colour	Matched to the nearest available shade, then to the previous batch	**Matched to your physical swatch or Pantone reference, every batch**
Crest / logo	Approximated or redrawn per production run	**Digitised once into an embroidery-ready file, checked per size**
Before bulk cutting	Order confirmed, then cut	**A physical sample in your colourway, approved by you first**
Sizing	Assumed distribution from a standard chart	**Charts calibrated to your people, plus an on-site measurement drive**
What you keep	An invoice	**A written specification every later order is produced against**
Reordering	Fresh quote, fresh sample, fresh negotiation	**From your own store page, against the standing specification**
Who handles wearers	Your office fields sizing, exchanges and payment	**Your store page and our WhatsApp — never your office**
Contact	Whoever answers	**One named contact, on email or WhatsApp**
Pricing changes	Raised mid-cycle when costs move	**Agreed before the cycle begins, not during it**
Sustainability claims	A policy page	**One named practice: offcuts reused as packaging. No certification claimed.**

Ask any supplier for these three

The written specification. The colour reference they will match to. The physical sample before bulk. If a supplier cannot produce all three, the reorder is where you will find out.

Ask where it is actually made

Ours is made in our own Delhi facility. For specialised requirements and peak volumes we use trusted production partners — under the same quality checks, and we say so rather than implying everything is in-house.

Ask when the price can move

A price that can be revised mid-season is not a price. Ours is agreed before the academic cycle or rollout begins.

> Fabric choice decides how a uniform looks in week one. Construction decides how it looks in month nine — and that is the one people remember when the reorder form comes round.

SERVICE, DELIVERY & SUPPORT

What you can hold us to

Commitments we make on every programme. We would rather list a short set we actually keep than a long one we qualify.

Sample before bulk

Nothing is cut at volume until you have held a physical sample in your colourway and signed it off.

Colour held on reorder

Every reorder is matched to the original reference on file, so later batches sit beside the first.

Delivered ahead of the date

Production is planned backwards from term start or rollout, and confirmed in writing before scheduling.

Your own online store

A store page listing only your garments, so a wearer cannot order the wrong item — and your office never handles an order.

Defects replaced at our cost

Any manufacturing defect, or a colour or sizing error against the approved sample, is replaced at our cost. Wrong sizes exchange within 14 days, unworn.

Specification you keep

Colours, fabrics, logo placement and size grade, documented and handed over. Your record, not just ours.

Price fixed for the cycle

Any revision is agreed before the academic cycle or rollout begins — never raised mid-season.

A person on WhatsApp

Orders, artwork, sizing and delivery with one named contact — not a ticket queue or a call centre.

Standards & eligibility

- ✓ **GeM tender eligible** — on the District / group programme, for public procurement.
- ✓ **Manufactured to your stated standard** — where high-visibility, flame-resistant or antimicrobial specifications are required, we build to the standard your site or client specifies.
- ✓ **Made in our own Delhi facility** — cutting, stitching and quality checks under our control. Peak-season volumes may use trusted partners, under the same checks, and we say so.
- ✓ **Beyond the listed range** — what is listed is what we supply as standard, not a boundary. A garment, fabric or mix outside it: we make to brief and quote from it.
- — **No environmental certification claimed.** Our one named practice is reusing cutting offcuts as packaging material.

How support actually runs

Placing an order	Your online store page, or WhatsApp and email until it is live
Sizing questions	Direct to us from the wearer — never through your office
Exchanges	Raised with us on WhatsApp, collected and replaced
Top-ups & new joiners	Against the standing specification — no re-quote, no re-sample
Delivery & turnaround	₹75–200 by location; customised orders 1 day to 1 week, bulk to the agreed schedule
Artwork & tenders	**info@uniformedge.co.in** — one named contact, for anything needing a record

The programme is designed so your office never touches an order

Wearers order from your own store page and pay us. We ship to them. Sizing, exchanges and mid-year joiners come to us. You set the specification once and approve the sample — everything after that is ours.

ORDERING ONLINE

Your own store page, not a catalogue order form

This catalogue is how you choose. The store is how everyone orders afterwards. Each organisation we take on gets its own page listing only its garments, in its own colourway — so nobody browses a general range and nobody orders the wrong item.

Open your page

One link, or one QR on a circular. Only your garments, your colourway, your size chart.

→

Order & pay direct

The wearer — or the parent — pays us. No money, no stock and no reconciliation through your office.

→

Delivered to the door

Straight to the home or the site. Sizing and exchanges come back to us on WhatsApp.

Nobody can order the wrong thing

The page carries your garments only — right colourway, right crest, right size chart. There is no general range to get lost in.

Open all year, not just at intake

Single garments, replacements and mid-year joiners run against the standing specification — no re-quote, no re-sample, no minimum.

Zero admin on your side

No uniform counter, no collection day, no receivable, no sizing calls at the front desk. You set the specification; we carry everything after it.

START HERE

Set up your store page

Message us with your crest artwork, a swatch or Pantone reference and rough headcount. We come back with a specification, a quote and a sample — then your page goes live.
